Cloverleaf Trick or Treat
October 31, 6:30 – 8:00p

Employee Spotlight

Since October is National Physical Therapy Month, we wanted to recognize our own **Brooke Falat** and make her our October Employee Spotlight. Brooke is a Physical Therapy Assistant and has worked at Cloverleaf for the last 7 years. Brooke got interested in Physical Therapy after babysitting for a young girl with Cerebral Palsy. The girl received regular physical therapy which started her down her career path.

Brooke went to school at Southern Illinois University in Carbondale where she also met her husband Mitch. Together they have one daughter Ava who is getting ready to turn two years old. In Brooke's free time, she really enjoys spending time outside with her family. They regularly spend their time at the park, swimming, or on weekend camping trips.

Trick or Treat 2016

We are proud to announce that we will be opening our doors to the public for another night of Trick or Treating. Trick or Treating will begin at 6:30pm until 8:00pm on October 31st. This is an event that our Residents love, and we hope to have a lot of little trick or treaters come through our door! Here are some pictures from last years event.

Cloverleaf Cookbook

Cloverleaf Healthcare is excited to start a facility wide cookbook. We feel like we have a lot of talented Residents, families, and staff which could contribute. So through the month of October we are asking that if our Residents, Resident families, and/or staff have a favorite recipe that they would like to share please submit to Stephanie Hayes in Activities or to Jordan Burnett at cloverleaf.cld@imgcares.com. The individual who submits the recipe will get recognition in the cookbook. The cookbooks will be available in the future. Thank you in advance to everyone for your help!

Russell Boatman

Russell Boatman has lived his entire life in the Wabash Valley. Originally born in North Terre Haute, he spent the majority of his life living on State Road 340 in Cloverland. He graduated High School from Otter Creek High School in Terre Haute.

Prior to graduation he tried to enlist into the Armed Forces during World War II, however he was unable to enlist because he didn't have a valid birth certificate. When he was born the doctor who delivered him didn't think that he was going to live. So he was never issued a birth certificate. However after graduation, the Navy had no problem drafting him.

He headed to basic training in the Chicago area. When he was done with basic training, he was transferred to the Seabees division where his responsibility was to load and unload cargo ships. For the majority of the time that he was a serviceman, he was located in the South Pacific.

Upon his discharge in the Navy, Russell went to work in the plastic film industry. He started there as a clerk, but he eventually moved up to a purchasing agent. He had a pretty important job as a purchasing agent. In fact all materials that were shipped to his and all the other plants had to have his signature on the shipping form or it couldn't be shipped. This included the plant in Holland. Russell worked in the plastic film industry for 41 years.

Russell has been satisfied with this time at Cloverleaf. "I've enjoyed my time here. The facility is always clean, and I really like the country setting. The rehab is the best I've seen. They have been very good to me and my wife over the years."

Customer Service Superstar

Brittney Bault is our month of October Customer Service Superstar. Brittney has been with Cloverleaf for the last four years as an employee, however she started two years prior as a volunteer. Her original position was working in the Dietary Department, but after 2 ½ years working there she transitioned to her current role as an Activity Department Aide.

Brittney was nominated because she has been going above and beyond what her role requires. She is always willing to pick up supplies in town for our Residents when they request it. She also volunteers her time to when needed to better enrich the lives of our Residents.

Brittney enjoys most at Cloverleaf is “working with the Residents and hearing their cool stories.” In her free time, she visits with her family and fiance. She became engaged to her boyfriend Sunny last July and is planned to marry in July 2017.

Employee of the Month

Kaitlynn Roe is our October Employee of the Month. She was nominated by our Resident Council because of her quality, compassionate care that she provides everyday. One of our Unit Managers stated, “She takes time with the Residents, the Residents enjoy when she is working their wing, and she is overall a very good aide.”

Kaitlynn has been at Cloverleaf for the last 6 months, and she enjoys all aspects of her job especially getting to know the Residents and learning their stories. She is currently seeking her nursing degree at Ivy Tech in Terre Haute. Because of her positive experience at Cloverleaf, she is considering working as a nurse in long-term care.

Kaitlynn has lived in Brazil her entire life and currently lives with family and her two year old daughter Kinleigh. When she isn't working she enjoys spending time with daughter most of all.
